

NOMADIX AND RN PROJECTS PARTNER TO DELIVER ROBUST NETWORKING SOLUTIONS ACROSS ASIA-PACIFIC AND THE MIDDLE EAST

February 14, 2023

Connectivity Demands Require Reliable, Secure Infrastructure of Wi-Fi 6 WLAN Access Points, WLAN Controllers and LAN Switches

LOS ANGELES, February 7, 2023 – **Nomadix® Inc.**, a technology leader in the hospitality and multi-tenant industries, today announced partnership with **RN Projects**, a leading multi-regional network system integrator. RN Projects specializes in the design and delivery of complex data networks into existing businesses and planned constructions across Australia, the South Pacific, Asia and the Middle East, and will offer the full Nomadix Networks portfolio across the hospitality, multi-tenant, office and aged-care markets.

Part of the Reivernet Group of Companies, RN Projects will capitalize on strong regional demand for technologies to enhance the connected experiences across their vertical markets by offering the Nomadix Networks range of products, including robust wireless access points, controllers and LAN switches, alongside its full portfolio of solutions.

"Nomadix has seen incredible growth year on year, and our reach has expanded to over 100 countries. RN Projects was a natural choice as a partner; they are one of the fastest growing system integrators across many key verticals and markets, which will enable us to better serve our customers across multiple regions," said Hauke Lenthe, managing director, EMEA and APAC at Nomadix. "Together, we will deliver significant benefits to our customers, combining the quality of the Nomadix Networks portfolio, with the high level of in-region technical, logistics and customer support from RN Projects."

Networks have become increasingly vital in today's digital age, and it is important to recognize that a network encompasses more than just Wi-Fi. As the use and variety of internet-based applications continue to grow, so too does the demand for seamless connectivity and high-speed solutions. Today's users require reliable and efficient network connections in order to meet their diverse needs. With RN Projects, Nomadix can help accelerate the implementation of these networks with our products.

"With the significant investment on the development and refurbishment of many properties across Asia-Pacific and the Middle East markets, we have seen a surge in demand for robust internet access, and by partnering with Nomadix and its available product inventory, we can confidently and comprehensively answer this demand, combining our Group's expertise with Nomadix's proven product portfolio," said Christoffer Svalstedt, Global Director of RN Projects.

"Nomadix's product range and their strong client endorsements make distributing their products a natural addition to ensuring our clients have easy access to their offering across a large geographic reach." said Reivernet Group CEO, David Stallworthy.
